International Journal for
Numerical Methods in Engineering

Volume 58 Number 1 • 7 September 2003

Analysis of microstructure development in shearbands by energy relaxation of incremental stress potentials: Large-strain theory for standard dissipative solids: C. Miehe and M. Lambrecht 1

Boundary element analysis of curved cracked panels with adhesively bonded patches: P. H. Wen, M. H. Aliabadi and A. Young 43

A fictitious domain decomposition method for the solution of partially axisymmetric acoustic scattering problems. Part 2: Neumann boundary conditions: U. Hetmaniuk and C. Farhat 63

Layout optimization with *h*-adaptivity of structures: J. C. A. Costa Jr and M. K. Alves 83

Extended finite element method for quasi-brittle fracture: S. Mariani and U. Perego 103

A meshfree method for incompressible fluid dynamics problems: I. Tsukanov, V. Shapiro and S. Zhang 127

Volume 58 Number 2 • 14 September 2003

Special Issue on Trends in Unstructured Mesh Generation

Guest Editors: Steve J. Owen and Mark S. Shephard

Editorial 159

Parallel Delaunay mesh generation kernel: N. Chrisochoides and D. Nave 161

Domain decomposition approach for parallel unstructured mesh generation: B. G. Larwood, N. P. Weatherill, O. Hassan and K. Morgan 177

Multiple material marching cubes algorithm: Z. Wu and J. M. Sullivan, Jr 189

Interpolating and meshing 3D surface grids: P. Laug and H. Borouchaki 209

Surface meshing using a geometric error estimate: P. J. Frey and H. Borouchaki 227

Accounting for curved domains in mesh adaptation: X. Li, M. S. Shephard and M. W. Beall 247

A new indirect anisotropic quadrilateral mesh generation scheme with enhanced local mesh smoothing procedures: Y. K. Lee and C. K. Lee 277

Object-oriented three-dimensional hybrid grid generation: A. N. Athanasiadis and H. Deconinck 301

A method for hexahedral mesh shape optimization: P. M. Knupp 319

Improving the quality of meshes for the simulation of semiconductor devices using Lepp-based algorithms: N. Hitschfeld, L. Villablanca, J. Krause and M. C. Rivara 333

An algorithm oriented mesh database: J.-F. Remacle and M. S. Shephard 349

Mesh-based geometry: S. J. Owen and D. R. White 375

The *International Journal for Numerical Methods in Engineering* is covered by the following abstracting and indexing services:

Applied Mechanics Reviews, BHRA Fluid Engineering Centre (Elsevier), Cambridge Scientific Abstracts/Materials Information, CompuMath Citation Index® (ISI), Current Contents®/Engineering, Computing & Technology (ISI), Earthquake Engineering Abstracts (NISEE), Ei COMPENDEX PLUS, Ei Page One, Geobase (Elsevier), Geotechnical Abstracts (Geotext Services), Indian Society of Earthquake Technology Bulletin, INSPEC, International Aeronautical Abstracts & Database (AIAA), International Civil Engineering Abstracts (Emerald), International Petroleum Abstracts, ISI Alerting Services, Materials Science Citation Index (ISI), Mathematical Reviews, Mechanics, PASCAL Database (INIST), Science Citation Index Expanded (also known as SciSearch®) (ISI), Science Citation Index® (ISI), Shock & Vibration Digest (Sage), Tribology and Corrosion Abstracts, Zentralblatt für Mathematik/Mathematics Abstracts.

Volume 58 Number 3 • 21 September 2003

Finite element analysis of advanced multilayer capacitors: L. Vu-Quoc, V. Srinivas and Y. Zhai 397

Improved multi-level Newton solvers for fully coupled multi-physics problems: J. Y. Kim, N. R. Aluru and D. A. Tortorelli 463

Parallel computing of high-speed compressible flows using a node-based finite element method: T. Fujisawa, M. Inaba and G. Yagawa 481

Pulsed charged sprays: application to DISI engines during early injection: J. S. Shrimpton 513

Volume 58 Number 4 • 28 September 2003

On the use of Somigliana's formula and Fourier series for elasticity problems with circular boundaries: S. L. Crouch and S. G. Mogilevskaya 537

Optimal stress sampling points of plane triangular elements for patch recovery of nodal stresses: S. Rajendran and K. M. Liew 579

Underwater shock-free surface–structure interaction: T. G. Liu, B. C. Khoo, K. S. Yeo and C. Wang. 609

A parametric study on the fractal finite element method for two-dimensional crack problems: J. F. Xie, S. L. Fok and A. Y. T. Leung 631

Knowledge-based algorithms in fixed-grid GA shape optimization: S. Y. Woon, L. Tong, O. M. Querin and G. P. Steven 643

A compromise programming method using multibounds formulation and dual approach for multi-criteria structural optimization: W. H. Zhang 661

Volume 58 Number 5 • 7 October 2003

Time continuity in cohesive finite element modeling: K. D. Papoulia, C.-H. Sam and S. A. Vavasis ... 679

A novel approach to the analysis of distributed shear banding in polymer blends: K. G. W. Pijnenburg and E. Van der Giessen 703

3D computer simulation of melt flow and heat transfer in the lost foam casting process: S. M. H. Mirbagheri, N. Varahram and P. Davami 723

Effective volume-fraction optimization for thermal stress reduction in FGMs using irregular *h*-refinement: J. R. Cho and H. J. Park 749

Topology optimization of trusses using genetic algorithm, force method and graph theory: A. Kaveh and V. Kalatjari 771

Shape optimization of bonded patch to cylindrical shell structures: L. Tong and X. Sun 793

Volume 58 Number 6 • 14 October 2003

Multiple fully stressed designs of steel frame structures with semi-rigid connections: M. Liu and S. A. Burns 821

A numerical model for induction heating processes coupling electromagnetism and thermomechanics: F. Bay, V. Labbe, Y. Favennec and J. L. Chenot 839

A Gaussian sinc-collocation approach for a whipping cantilever with a follower shear force at its tip: S. R. Reid and D. Roy 869

The meshless finite element method: S. R. Idelsohn, E. Oñate, N. Calvo and F. Del Pin 893

Identification of coating defects in cathodically protected underground pipelines: P. Miltiadou and L. C. Wrobel 913

Improved conditioning of infinite elements for exterior acoustics: D. Dreyer and O. von Estorff 933

On the Pareto optimum sensitivity analysis in multicriteria optimization: W. H. Zhang 955

Volume 58 Number 7 • 21 October 2003

Three-dimensional BEM for scattering of elastic waves in general anisotropic media: Y. Niu and M. Dravinski 979

Solution strategies for the delamination analysis based on a combination of local-control arc-length and line searches: G. Alfano and M. A. Crisfield 999

Numerical implementation of the symmetric Galerkin boundary element method in 2D elasto-dynamics: W. Yuan, Z. Zhao, S. T. Lie and G. Yu 1049

'Ultimate' robustness in meshing an arbitrary polyhedron: P. L. George, H. Borouchaki and E. Saltel 1061

Elastodynamic guided wave scattering in infinite plates: J. M. Galán and R. Abascal 1091

Volume 58 Number 8 • 28 October 2003

On discontinuous Galerkin methods: O. C. Zienkiewicz, R. L. Taylor, S. J. Sherwin and J. Peiró 1119

Singularity extraction technique for integral equation methods with higher order basis functions on plane triangles and tetrahedra: S. Järvenpää, M. Taskinen and P. Ylä-Oijala 1149

Quasi-dual reciprocity boundary-element method for incompressible flow: Application to the diffusive–advective equation: C. F. Loeffler and W. J. Mansur 1167

Structural design optimization on thermally induced vibration: B. Chen, Y. Gu, H. Zhang and G. Zhao . 1187

A posteriori error estimates and an adaptive scheme of least-squares meshfree method: S.-H. Park, K.-C. Kwon and S.-K. Youn 1213

Near-crack contour behaviour and extraction of log-singular stress terms of the self-regular traction boundary integral equation: A. B. Jorge, T. A. Cruse and T. S. Fisher 1251

Volume 58 Number 9 • 7 November 2003

Stability and accuracy of the iterative differential quadrature method: S. Tomasiello 1277

c-Type method of unified CAMG and FEA. Part 1: Beam and arch mega-elements—3D linear and 2D non-linear: D. Ray 1297

Finite cover method for linear and non-linear analyses of heterogeneous solids: K. Terada, M. Asai and M. Yamagishi 1321

Parallel computational strategies for structural optimization: M. Papadrakakis, N. D. Lagaros and Y. Fragakis 1347

Dispersion analysis of a non-conforming finite element method for the Helmholtz and elastodynamic equations: F. I. Zyserman, P. M. Gauzellino and J. E. Santos 1381

Time-decomposed parallel time-integrators: theory and feasibility studies for fluid, structure, and fluid–structure applications: C. Farhat and M. Chandesris 1397

Volume 58 Number 10 • 14 November 2003

Non-reflecting artificial boundaries for transient scalar wave propagation in a two-dimensional infinite homogeneous layer: C. Zhao and T. Liu 1435

An accurate scheme for mixed-mode fracture analysis of functionally graded materials using the interaction integral and micromechanics models: J.-H. Kim and G. H. Paulino 1457

Hybrid-stabilized solid-shell model of laminated composite piezoelectric structures under non-linear distribution of electric potential through thickness: L. Q. Yao and L. Lu 1499

Implicit integration and consistent tangent modulus of a time-dependent non-unified constitutive model: M. Kobayashi, M. Mukai, H. Takahashi, N. Ohno, T. Kawakami and T. Ishikawa 1523

Multi-time-step and two-scale domain decomposition method for non-linear structural dynamics: A. Gravouil and A. Combescure 1545

Vector level sets for description of propagating cracks in finite elements: G. Ventura, E. Budyn and T. Belytschko 1571

Volume 58 Number 11 • 21 November 2003

Theory and numerics of geometrically non-linear open system mechanics: E. Kuhl and P. Steinmann 1593

Parallel multipole implementation of the generalized Helmholtz decomposition for solving viscous flow problems: M. J. Brown, A. A. Mammoli and M. S. Ingber 1617

Analysis of 3D problems using a new enhanced strain hexahedral element: P. M. A. Areias, J. M. A. César de Sá, C. A. Conceição António and A. A. Fernandes 1637

Algorithms for automated meshing and unit cell analysis of periodic composites with hierarchical tri-quadratic tetrahedral elements: H. J. Kim and C. C. Swan 1683

A novel unsymmetric 8-node plane element immune to mesh distortion under a quadratic displacement field: S. Rajendran and K. M. Liew 1713

Volume 58 Number 12 • 28 November 2003

Numerical solution of eddy current problems in ferromagnetic bodies travelling in a transverse magnetic field: W. Peterson 1749

Oscillatory crack tip triangular elements for finite element analysis of interface cracks: C. H. Liu and C. Huang 1765

The modeling and numerical analysis of wrinkled membranes: H. Ding and B. Yang 1785

A new rigid-viscoplastic model for simulating thermal strain effects in metal-forming processes: E. N. Dvorkin and R. G. Toscano 1803

Studies in elastic fracture mechanics based on the material force method: R. Denzer, F. J. Barth and P. Steinmann 1817

Earthquake response analysis in the time domain for 2D soil–structure systems using analytical frequency-dependent infinite elements: D. K. Kim and C.-B. Yun 1837

Tetrahedral mesh generation based on advancing front technique and optimization scheme: W.-Y. Choi, D.-Y. Kwak, I.-H. Son and Y.-T. Im 1857

Dynamic crack propagation based on loss of hyperbolicity and a new discontinuous enrichment: T. Belytschko, H. Chen, J. Xu and G. Zi 1873

Volume 58 Number 13 • 7 December 2003

Free vibration analysis of arches using curved beam elements: J.-S. Wu and L.-K. Chiang 1907

Efficient preconditioners for boundary element matrices based on grey-box algebraic multigrid methods: U. Langer, D. Pusch and S. Reitzinger 1937

Finite element analysis of time-dependent semi-infinite wave-guides with high-order boundary treatment: D. Givoli, B. Neta and I. Patlashenko 1955

A polynomial collocation method for the numerical solution of weakly singular and singular integral equations on non-smooth boundaries: G. Monegato and L. Scuderi 1985

A solid-like shell element allowing for arbitrary delaminations: J. J. C. Remmers, G. N. Wells and R. de Borst 2013

An enriched finite element method and level sets for axisymmetric two-phase flow with surface tension: J. Chessa and T. Belytschko 2041

Volume 58 Number 14 • 14 December 2003

Finite element analysis and evaluation of design limits for structural materials in a cyclic state of creep: M. Boulbibane and A. R. S. Ponter 2065

Improvement of a frictional contact algorithm for strongly curved contact problems: M. C. Oliveira, J. L. Alves and L. F. Menezes 2083

Hierarchic finite element bases on unstructured tetrahedral meshes: M. Ainsworth and J. Coyle 2103

On the numerical implications of multiplicative inelasticity with an anisotropic elastic constitutive law: C. Sansour and J. Bocko 2131

Numerical *p*-version refinement studies for the regularized stress-BEM: J. D. Richardson 2161

A 4-node assumed strain quasi-conforming shell element with 6 degrees of freedom: K. D. Kim, G. R. Lomboy and G. Z. Voyiadjis 2177

A new scheme for efficient and direct shape optimization of complex structures represented by polygonal meshes: J. Shen and D. Yoon 2201

Extending the functionality of the general-purpose finite element package SEPRAN by automatic differentiation: C. H. Bischof, H. M. Bücker, B. Lang, A. Rasch and J. W. Risch 2225

Volume 58 Number 15 • 21 December 2003

A posteriori error approximation in EFG method: L. Gavete, M. L. Gavete, B. Alonso and A. J. Martin 2239

A-scalability and an integrated computational technology and framework for non-linear structural dynamics. Part 1: Theoretical developments and parallel formulations: R. Kanapady and K. K. Tamma 2265

A-scalability and an integrated computational technology and framework for non-linear structural dynamics. Part 2: Implementation aspects and parallel performance results: R. Kanapady and K. K. Tamma 2295

Broadband model order reduction of polynomial matrix equations using single-point well-conditioned asymptotic waveform evaluation: derivations and theory: R. D. Slone, R. Lee and J.-F. Lee 2325

Iterative LCP solvers for non-local loading–unloading conditions: E. Benvenuti and A. Tralli 2343

A method for structural dynamic contact problems with friction and wear: N. Strömberg 2371
